

Registration for the SIDirect - The Direct Automation System Integrator Program

SI Classifications

Within the network of Direct Automation partners, we recognize that SI's play a critical role in delivering, integrating and maintaining Direct Automation products and solutions.

As such, Direct Automation classifies SI's according to a system, based on experience with specific products, proven industry expertise, region and markets served.

By providing the requested information below, you can help us at Direct Automation determine how we can best work together. Please take the time to completely and accurately fill in the application form.

Company Information

Company Name

Address

City / State / Postcode

In what industry or market segment does your company specialize?:

Indicate the Geographical Location you would operate in

List the other system integrator programs of which your company is a member and/or your company's partner(s) name(s):
