WARNING: Do not add or remove modules with field power applied.

Step One: With latch in "locked" position, align connectors on the side of each module and stack by pressing together. Click indicates lock is engaged.

Step Two: Attach field wiring using the removable terminal block or ZIPLink wiring system.

Check all latches are secure after modules are connected.

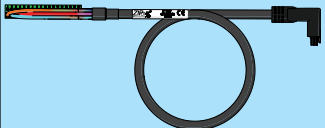

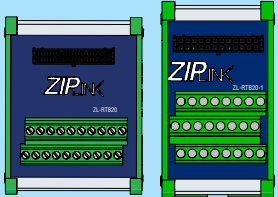

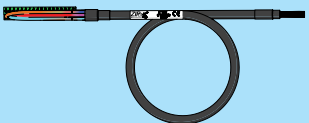

Step Three: To unstack modules, pull locking latch up into the unlocked position and then pull modules apart.

Use any QR Code reader application to display the module's product insert.
